TELEWIRE, INC. HELPS COMPANIES TAKE ADVANTAGE OF SIGNIFICANT TAX-BREAKS FOR NEW TECHNOLOGY

*Telewire, Inc. Educates Customers on
Powerful Stimulus Plan*

SALISBURY, MD —
November 29, 2011 —
Telewire, Inc., a leading
provider in unified
communications, announced
today that the company is
helping customers take
advantage of a large tax-break
for small to mid-sized
businesses with Internal
Revenue Code (IRC) Section
179. The tax benefit targets
businesses who are
contemplating large equipment
purchases, such as technology,
and significantly reduces the
cost of purchasing such
equipment. Section 179 allows
business owners to write-off the
entire cost, up to \$500,000, on
new equipment purchases made
by December 31st, 2011.

Many Americans were left
wondering how the Stimulus
Package would have an impact
on their lives and Section 179
has answered that question for
many business owners. Creating
significant savings on major
purchases of equipment,
software or phone systems, the
federal government has enacted
this bill in an effort to spur
business-to-business spending.

Right now businesses can
expense the entire purchase
price of qualifying
equipment/software/phone
systems in the first year up to
\$500,000 (to be reduced to
\$125,000 at the end of the 2011
tax year). Also slated to expire
at the end of the 2011 tax year is
the 100% Bonus Depreciation,
which will drop down to 50
percent. For example, assuming
you're in a 35% tax bracket, a
\$45,000 purchase would drop
dramatically, and would cost
approximately \$29,250 after
Section 179 has been applied to
the transaction. In a transaction
like this, Section 179 would
yield a total savings of \$15,750.
While every transaction is
different and tax professionals
should be consulted on specific
situations, the potential rewards
of this government program has
persuaded many business
owners to seriously consider
investing in new equipment
before year-end.

The one caveat associated
with this powerful program is
that the new equipment must be
in use by December 31, 2011 in
order to qualify for the massive
savings. This year, Section 179
also extends to cover software
purchases in addition to

traditional equipment. Many
business owners have installed
new business phone systems as a
result of this addition to the tax
code, because recent
breakthroughs in
telecommunications are
enabling businesses to
collaborate better, faster and
more efficiently with one
another.

"We were stunned to find
out that so many of our
customers had not yet heard of
Section 179," commented Bryan
Murfree, President of Telewire,
Inc.. "We may specialize in
delivering technology solutions
to our customers, but we treat
our customers like partners. If
we find something as powerful
as this we have always
considered it to be our duty to
communicate this information to
our customers. Our goal is to
introduce our customers to
technology that increases their
productivity, but more
importantly increases their
profitability. When an
opportunity like this comes
along, we're thrilled to skip
discussions regarding
technology, and go straight to
the part where our customers get
to enjoy increased profitability.
That's why we're different and

we plan on continuing to treat our customers like gold.”

ABOUT TELEWIRE, INC.

Telewire is a locally owned and operated telecommunications company specializing in the communications needs of the Delmarva business community. The company offers a broad range of voice and data services, as well as the latest innovations in office equipment. Telewire

has established strategic partnerships with a spectrum of leading edge business system providers such as Mitel and Zultys enabling the company to deliver the most advanced applications, including: Multi-Node Networking, IP Telephony, Unified Messaging, Interactive Voice Response and Voice Mail Integration. With over 25 years of experience in the telecommunications industry,

Telewire has the resources and expertise to find multiple solutions for any business problem. Regardless of the size of business, Telewire can design a system which is efficient, user-friendly and cost-effective.
